NEW Just shipped

Live captures

Real websites on desktop, tablet and phone, with colours, fonts and spacing measured from the live page.

MCP server

Claude Code, Cursor and other AI tools can search Uiverse and pull specs while they build.

Guide

Tell it what you're building, your industry and RTL, and it opens matching designs.

Arabic · RTL

A right-to-left filter on the home page, plus a "Captured from the live web" row.

01 Browse & search

- **Feeds** for Web, Apps, Components, 3D, Layouts and Palettes
- **Filters** only show options with results
- **Search (⌘K)** understands phrases and synonyms
- **Explore** by industry, type and style
- **Creators & Sources** everything from one designer or site
- **Pick of the week** and Popular this week

02 Design details

- **Breakdown** colours, fonts, spacing and sections
- **Copy any value** with one click
- **Export** to CSS, Tailwind or SwiftUI, free
- **Overlay or full page** open details without losing your place

03 Saving

- **Save any design** with an undo option
- **Synced** across browser tabs

04 Prompt generator

- **Ready-to-paste build prompt** for any design

Claude · ChatGPT · Cursor · Codex · v0 · Lovable · Bolt · Next.js · React · HTML · Vue · SwiftUI

05 Design & quality

- **Retro-editorial look** new logo, light and dark mode
- **Responsive** phone, tablet and laptop
- **Accessible** keyboard and screen-reader friendly
- **Fast** light pages that don't jump while loading

06 Pricing

FREE

Browsing, saving, filters, the full Breakdown and every export.

PAID

Generated prompts only. Each prompt is charged once, and copying it again is free.
